INDUSTRIAL RANGE

HIMOINSA Company with quality certification ISO 9001

HIMOINSA gensets are compliant with EC mark which includes the following

- 2006/42/CE Machinery safety.
 2014/30/UE Electromagnetic compatibility.
 2014/30/UE electrical equipment designed for use within certain voltage limits
 2000/14/EC Sound Power level. Noise emissions outdoor equipment. (amended by
- FN 12100, FN 13857, FN 60204

Ambient conditions of reference according to ISO 8528-1:2020 normative: 1000 mbar, 25°C, 30% relative humidity.

Prime Power (PRP):
According to ISO 8528-1:2020, Prime power is the maximum power which a generating set is capable of delivering continuously whilst supplying a variable electrical load when operated for an unlimited number of hours per year under the agreed operating conditions with the maintenance intervals and procedures being carried out as prescribed by the manufacturer. The permissible average power output (Ppp) over 24 h of operation shall not exceed 70 % of the PRP.

Emergency Standby Power (ESP):
According to ISO 8528-1:2020, Emergency standby power is the maximum power available during a variable electrical power sequence, under the stated operating conditions, for which a generating set is capable of delivering in the event of a utility power outage or under test conditions for up to 200 h of operation per year with the maintenance intervals and procedures being carried out as prescribed by the manufacturers. The permissible average power output over 24 h of operation shall not exceed 70 % of the ESP

Continuous Power (COP): According to Standard ISO 8528-1:2020, this is the maximum power available for continuous loads for unlimited running hours a year between the maintenance times recommended by the manufacturer under the environmental conditions established by the same.

"Class G2" performance according to the load impact test according to ISO 8528-5:2020

Industrial design under patent.

Engine Specifications | 1.500 r.p.m.

Rated Engine Output (PRP)	kW	134,1
Rated Engine Output (ESP)	kW	148,1
Manufacturer		BAUDOUIN
Model		6M11G165.5
Engine Type		4-stroke diesel
Injection Type		Direct
Aspiration Type		Turbocharged and after-cooled
Number of cylinders and arrangement		6-L
Bore and Stroke	mm	105 x 130
Displacement	L	6,75
Cooling System		Liquid (water + 50% glycol)
Lube Oil Specifications		API CF or CH4, SAE 15W-40
Compression Ratio		18:1

Lube oil consumption with full load		0,2 % of fuel consumption
Total oil capacity including tubes, filters	L	19
Total coolant capacity	L	17
Governor	Type	Electrical
Air Filter	Type	Dry
Inner diameter exhaust pipe	mm	80

- Diesel engine
- 4-stroke cycle
- Water-cooled
- 12V electrical system
- Water separator filter (no visible level)
- Dry air filter
- Radiator with pusher fan
- HTW sender
- LOP sender
- Electronic governor

- Hot parts protection
- Moving parts protection
- Radiator water level sensor (Optional).

Generator Specifications | MECC ALTE

Manufacturer		MECC ALTE
Model		ECP34.1L4C
Poles	No.	4
Connection type (standard)		Star-series
Mounting type		S-3 11"1/2
Insulation	Class	H class

Enclosure (according IEC-34-5)	IP23
Exciter system	Self-excited, brushless
Voltage regulator	A.V.R. (Electronic)
Bracket type	Single bearing
Coupling system	Flexible disc
Coating type	Standard (Vacuum impregnation)

- Self-excited and self-regulated
- 4 poles
- AVR governor
- IP23 protection
- H class insulation

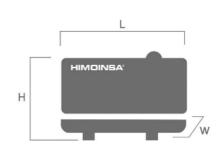

WEIGHT AND DIMENSIONS

		Standard Version	High Capacity version	High Capacity version
Length (L)	mm	3300	3300	3300
Height (H)	mm	1956	1956	2179
Width (W)	mm	1200	1200	1200
Maximum shipping volume	m³	7,75	7,75	8,63
Weight with liquids in radiator and sump	Kg	2257	2348	2511
Fuel tank capacity	L	450	600	1100
Autonomy (70% PRP)	Hours	20	26	48
Autonomy (100% PRP)	Hours	14	18	34
		Plastic tank	Steel tank	Steel tank

SOUND PRESSURE

Sound pressure level	dB(A)@7m	68 ± 2.4
Courta procedure lever	QD() () C) 111	00 - 2, 1

APPLICATION DATA

EXHAUST SYSTEM

Maximum exhaust temperature	°C	550
Exhaust Gas Flow	m³/min	30,12
Maximum allowed back pressure	mbar	60
Exhaust Flange Size (external diameter)	mm	120

NECESSARY AMOUNT OF AIR

Intake air flow	m³/h	546
Cooling Air Flow	m³/s	5,08
Alternator fan air flow	m³/s	0,487

FUEL CONSUMPTION

Fuel Consumption ESP	l/h	36,1
Fuel Consumption 100% PRP	l/h	32,7
Fuel Consumption 70 % PRP	l/h	22,94
Fuel Consumption 50 % PRP	l/h	16,7

FUEL SYSTEM

Fuel Oil Specifications		Diesel
Maximum power suction pump	mm Hg	375
Maximum return feed pump	mm Hg	375
Fuel Tank	L	450
Other fuel tank capacities	L	600, 1.100

STARTING SYSTEM

Starting power	kW	4
Starting power	CV	5,44
Recommended battery	Ah	44
Auxiliary Voltage	Vdc	12

Soundproofed version

- Steel chassis
- Anti-vibration shock absorbers
- Chassis with integrated fuel tank
- Fuel level gauge
- External emergency stop switch
- Bodywork made from high quality steel plate.
- High mechanical strength
- Low noise emissions level

- Soundproofing provided by high-density volcanic rock wool
- Epoxy polyester powder coating
- Full access for maintenance (water, oil and filters, no need to remove the canopy)
- Reinforced lifting hooks for crane hoisting (except version with tank of 1100 liters)
- Watertight chassis (acts as a double barrier against liquid retention)
- Fuel tank drain plug
- Chassis drain plug
- Chassis ready for future mobile kit installation

- Steel residential silencer -35db(A) attenuation.
- Oil sump extraction kit
- Versatility to assemble a high capacity chassis with a metallic fuel tank
- IP Protection according to ISO 8528-13:2016
- 3 way valve for external fuel supply (available in 1/2" and 3/8" fittings) (Optional).
- Fuel transfer pump (Optional).

CONTROL PANELS

M5

Digital manual Auto-Start control panel and thermal magnetic protection (depending on current and voltage) and differential with CEM7.

Digital control unit CEM7

AS5

Automatic panel WITHOUT transfer switch and WITHOUT mains control with CEM7 unit. (*) AS5 as optional with CEA7 unit. Automatic panel without transfer switch and WITH mains control.

CC2

Himoinsa Switching cabinet WITH display

Digital control unit CEC7

AS5 + CC2

Automatic panel WITH transfer switch and with mains control. The display will be on the genset and on the cabinet.

Digital control unit CEM7+CEC7

AC5

Automatic mains failure control panel. Wall-mounted cabinet WITH transfer switch and thermal magnetic protection (depending on current and voltage).

Digital control unit

Electric control and power panel with measurements devices and control unit (according to necessity and configuration)

- Adjustable earth leakage protection (time & sensitivity) standard in M5 and AS5, with thermal magnetic protection
- Battery charger (standard on gensets with automatic control panels)
- Heating resistor (standard on sets with automatic control panels)
- Battery charger alternator with ground connection
- Starter battery/ies installed (cables and bracket included)

Electrical system

- Ground connection electrical installation with connection ready for ground spike (not supplied)
- Battery Switch (Optional).
